Contract Entity - View Contract Documents

Updated on May 23, 2025

Focus Listen

On the Contract details page, you can view the contract documents using the **Documents** button available on the top right corner of the application. The Documents option further contains the following two options:

- **Document Repository:** Displays the Contract and Documents in the respective hierarchy.
- **Contract Documents:** To view the documents that are uploaded through the document **Upload** option under ‘Contract Documents’ tab in Sirion web application.

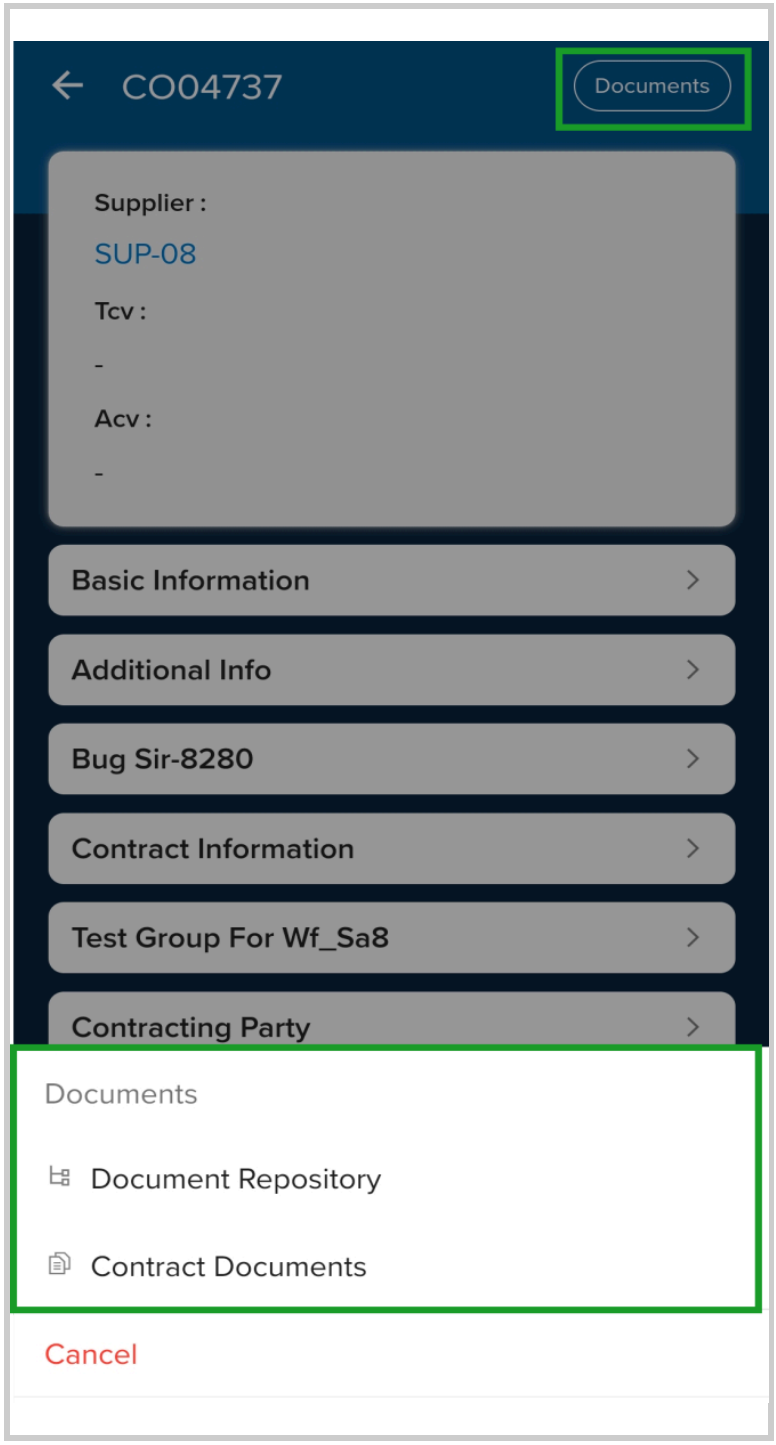

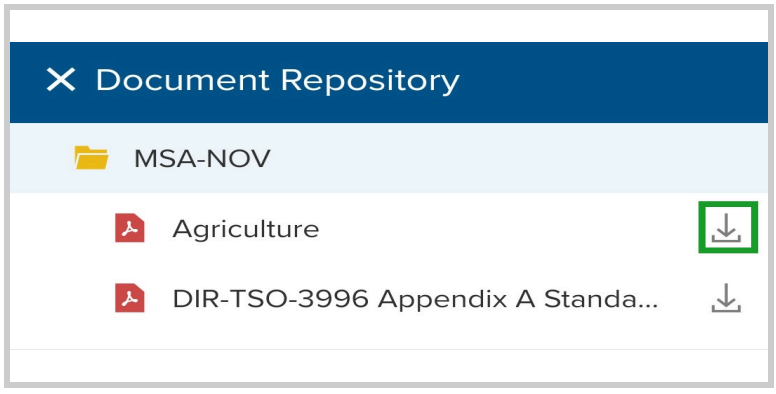

Document Repository

Under the **Document Repository** section, a user can view the list of all the documents and download them using the ( ) icon. On clicking the document name, the user can view the document in the Document Viewer.

Only the immediate child contract and parent contract for the respective contract Entity will be visible to the user as per their access permission.

A user can only view a maximum of five documents and five child contracts at a time. More documents/child contracts can be viewed by using the ‘More’ option.

Contract Documents

On clicking the **Contract Documents** option, you can view the latest version of the respective contract documents, and also perform a search operation on the document list. The ability to view the document in the Document Viewer is not available for Contract entity's contract documents, though you can still download the document and view them in the mobile document viewer.

On clicking the More (⋮) icon available against respective document, the following two options will appear:

- **Download File:** To download the contract document
- **Edit Status:** To change the status of the document. For more details, refer: Edit Status of Documents section
