Document Search

Updated on May 23, 2025

Focus Listen

You can search Contract documents using the following search types:

- Contract Documents
- Attachments

Both the above-mentioned search types support the following file types:

- PDF
- XLS/XLSX
- DOC/DOCX
- TXT

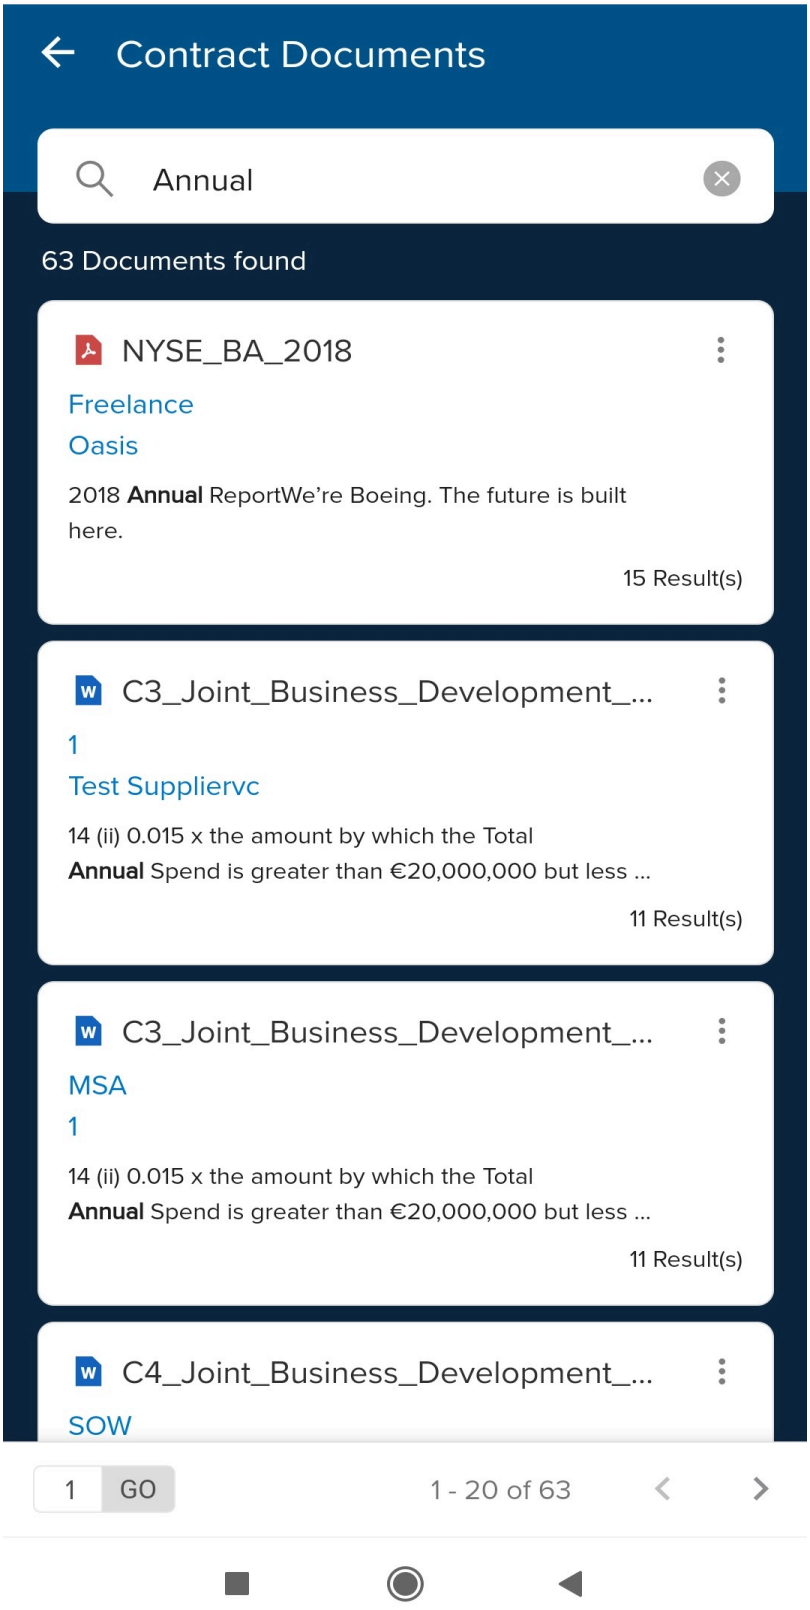

Contract Documents

Contract Documents or Document Tree search option provides content-based search. Under this option, Sirion searches all document trees under a contract for a specified query by name and content.

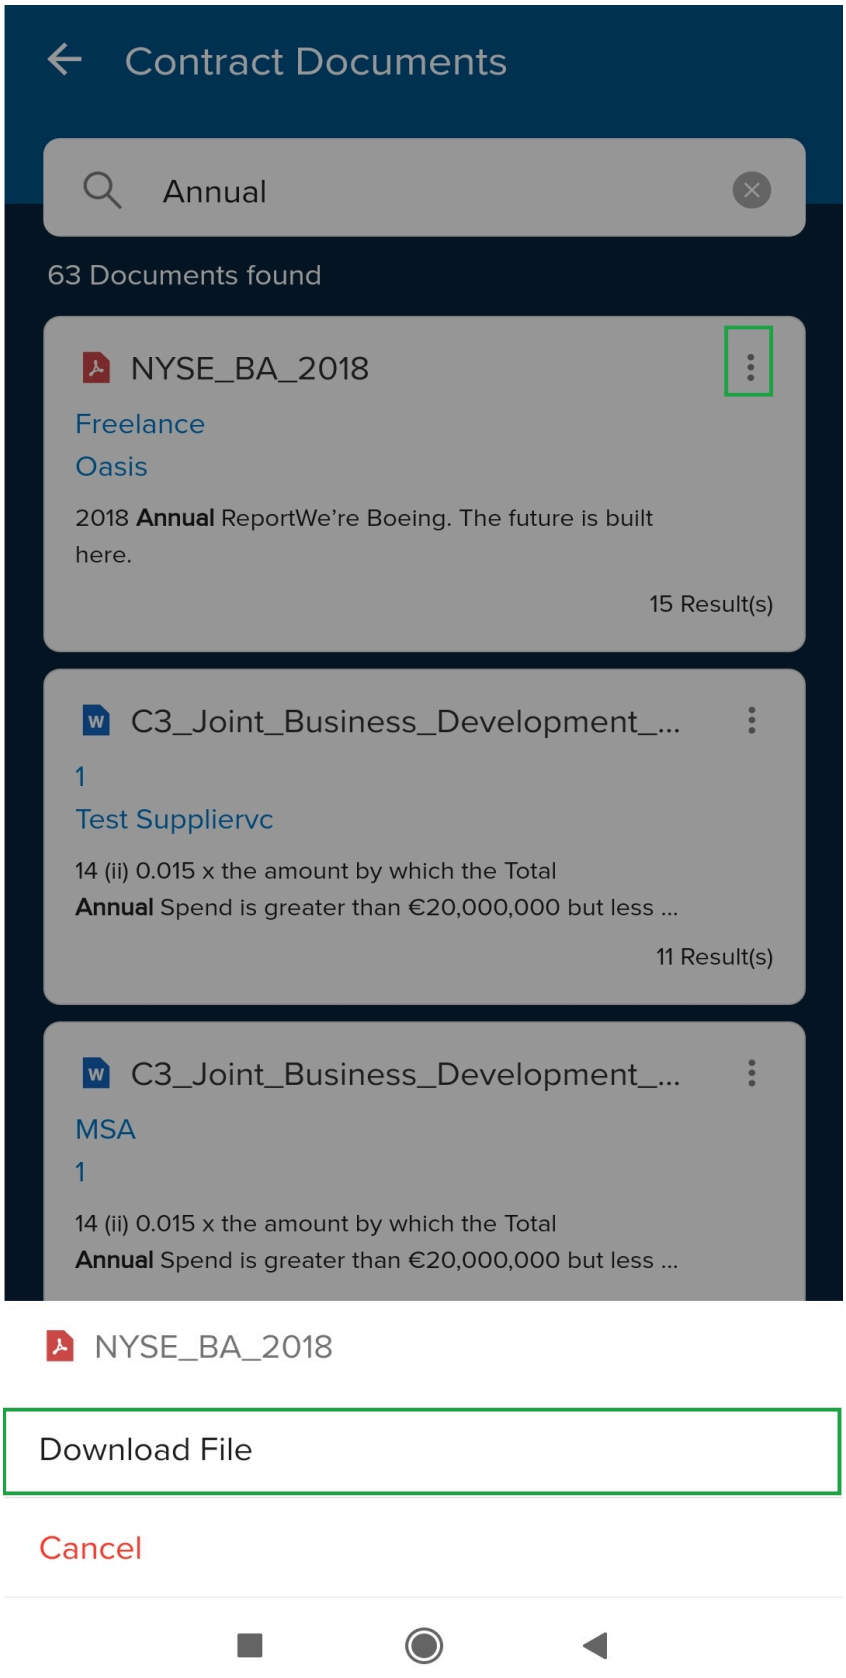

Perform the following steps to carry out the search based on the contract documents:

1. Enter a search query in the **Search** box.
2. Click the **Contract Documents containing** option.
   This displays the contract documents for the respective query in the Search page.

Search
Annual
Entity ID matching Annual
Contract Documents containing Annual
Attachments containing Annual

3. In case, if you want to download the contract document, then click the (⋮) option and click the **Download File** option.

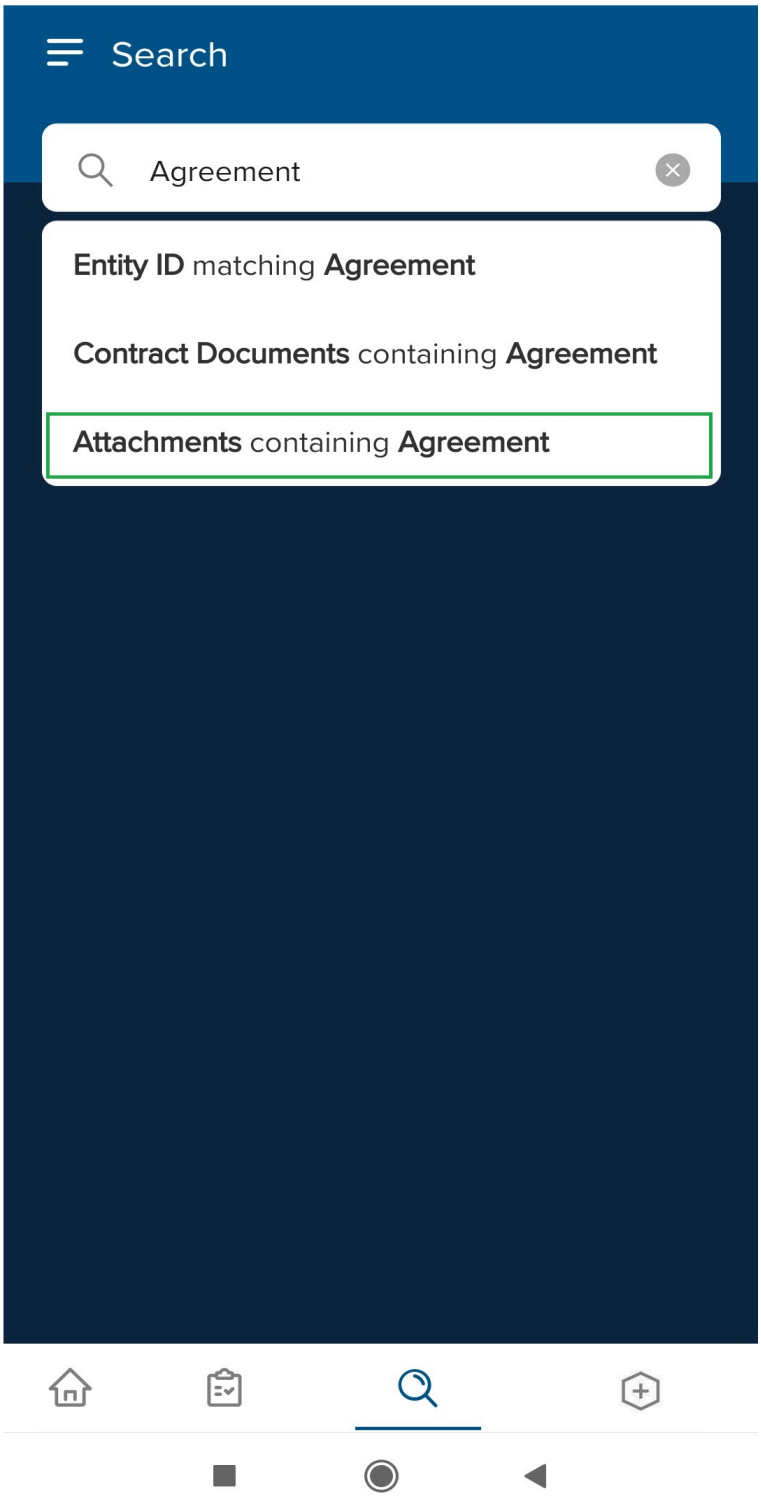

Attachments

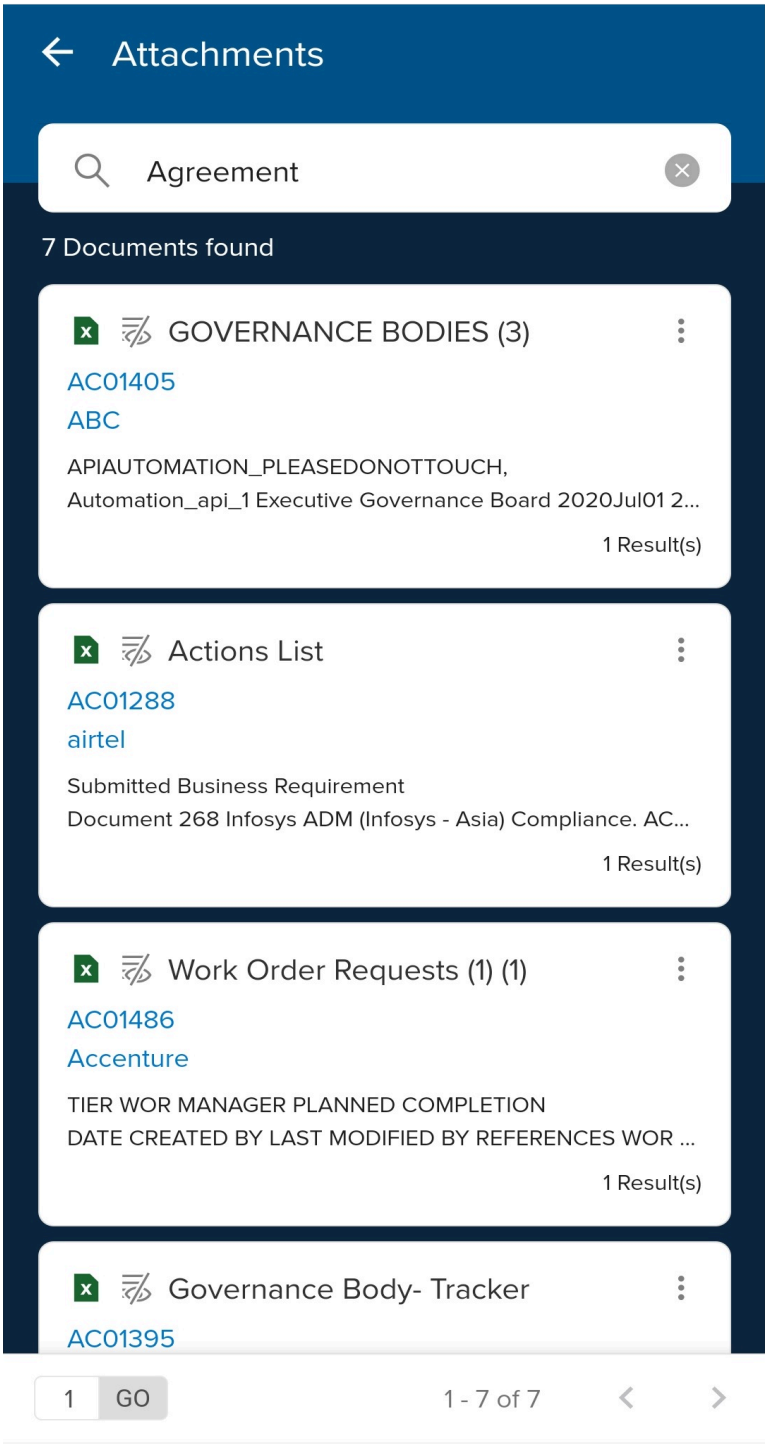

Like Contract Documents, Attachments also perform content-based search. All the documents uploaded by the user under the **Communication** section can be searched by Attachments search option. The Attachments search option searches the search string within the attachment's content only, it does not search results based on the attachment (file) name/title. You can perform Attachments search using the Search box.

Perform the following steps to carry out the search based on the Attachments:

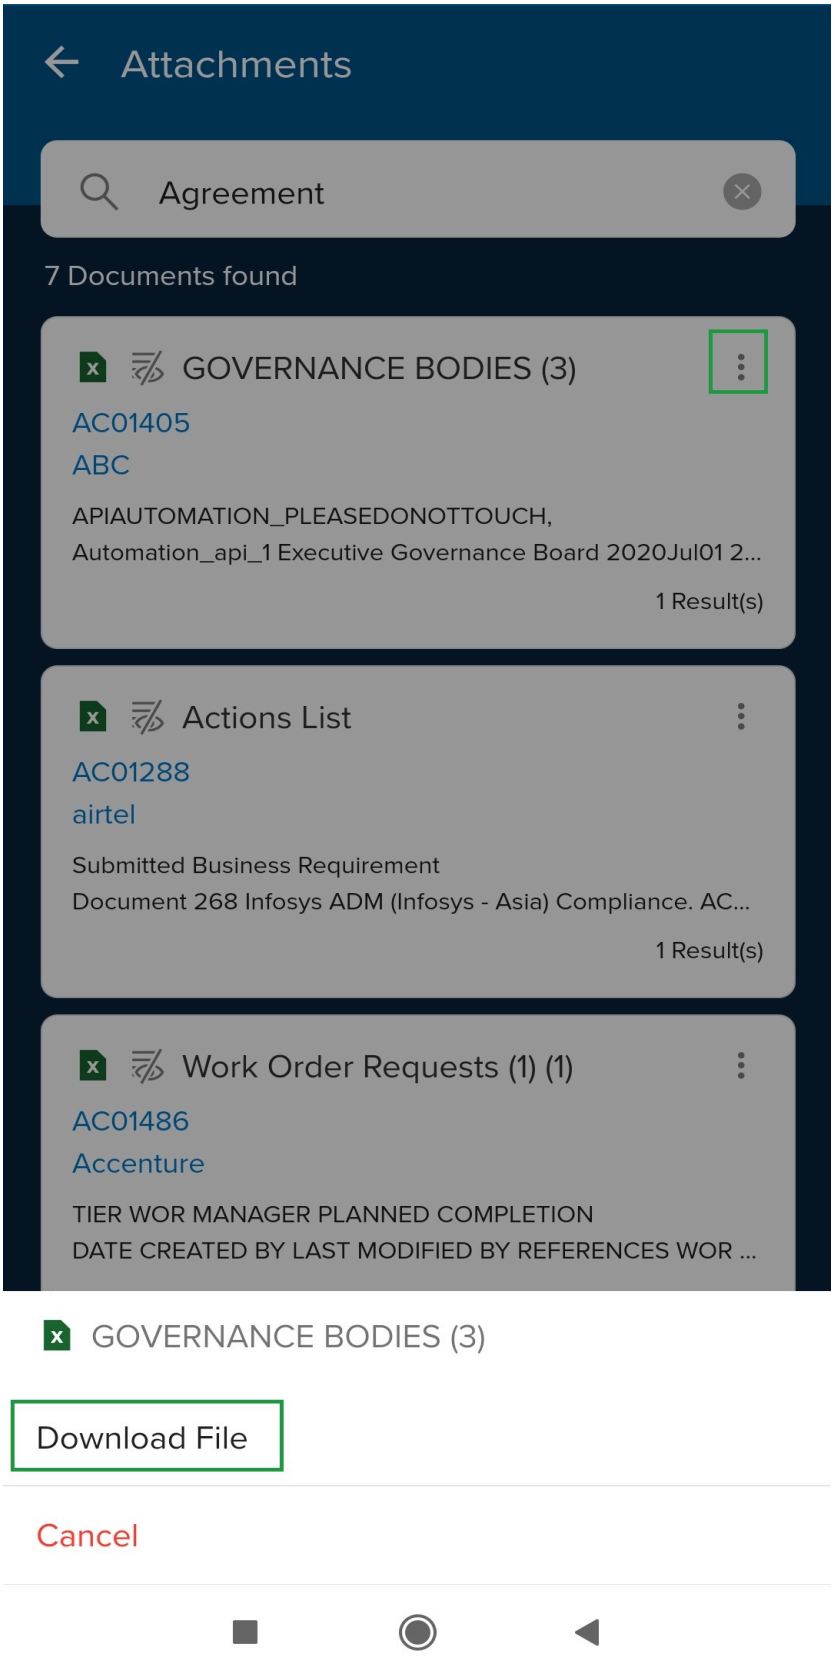

1. Enter a search query in the **Search** box.
2. Select **Attachments containing** option.

   This displays the attachments for the respective query in the Search page.

Search
Agreement
Entity ID matching Agreement
Contract Documents containing Agreement
Attachments containing Agreement

3. In case, if you want to download the attached documents, then click the (⋮) option and click the **Download File** option.
