Entity Listing Page Overview

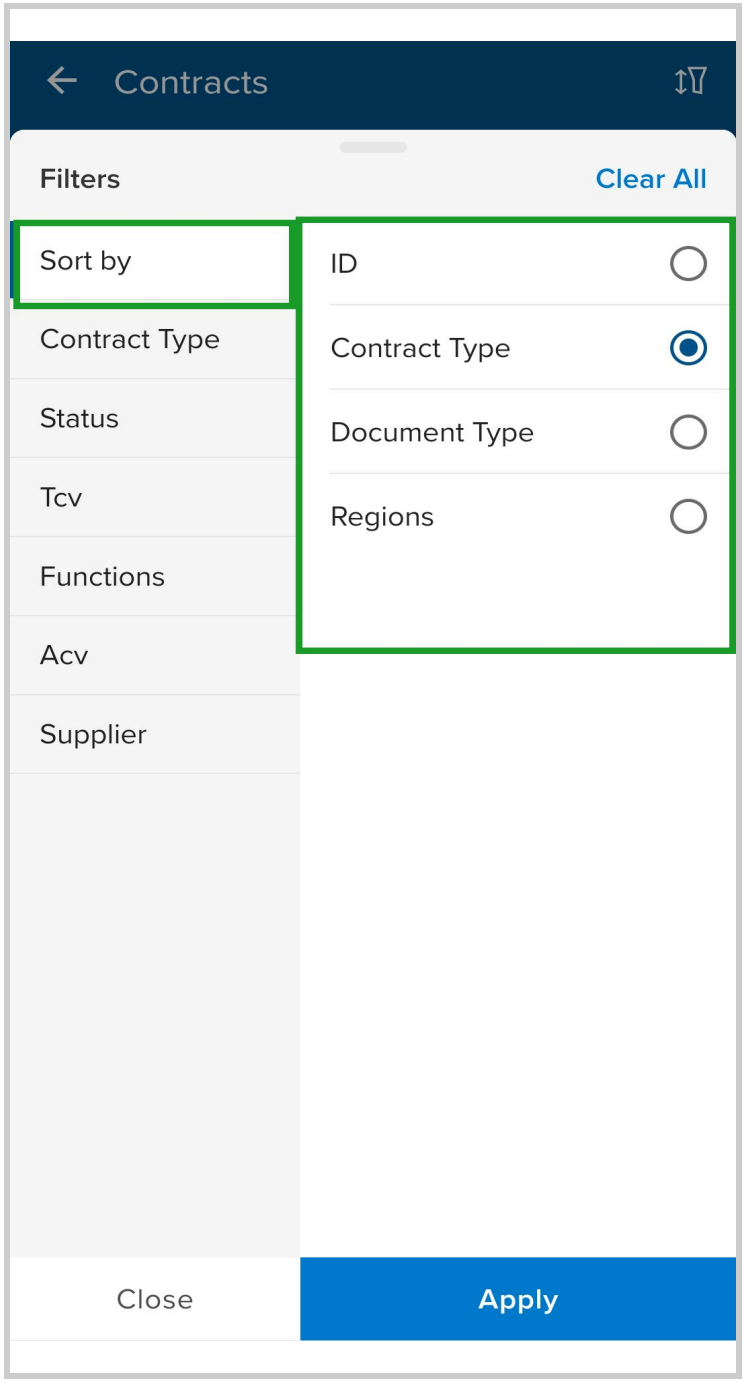

Published on Apr 24, 2025

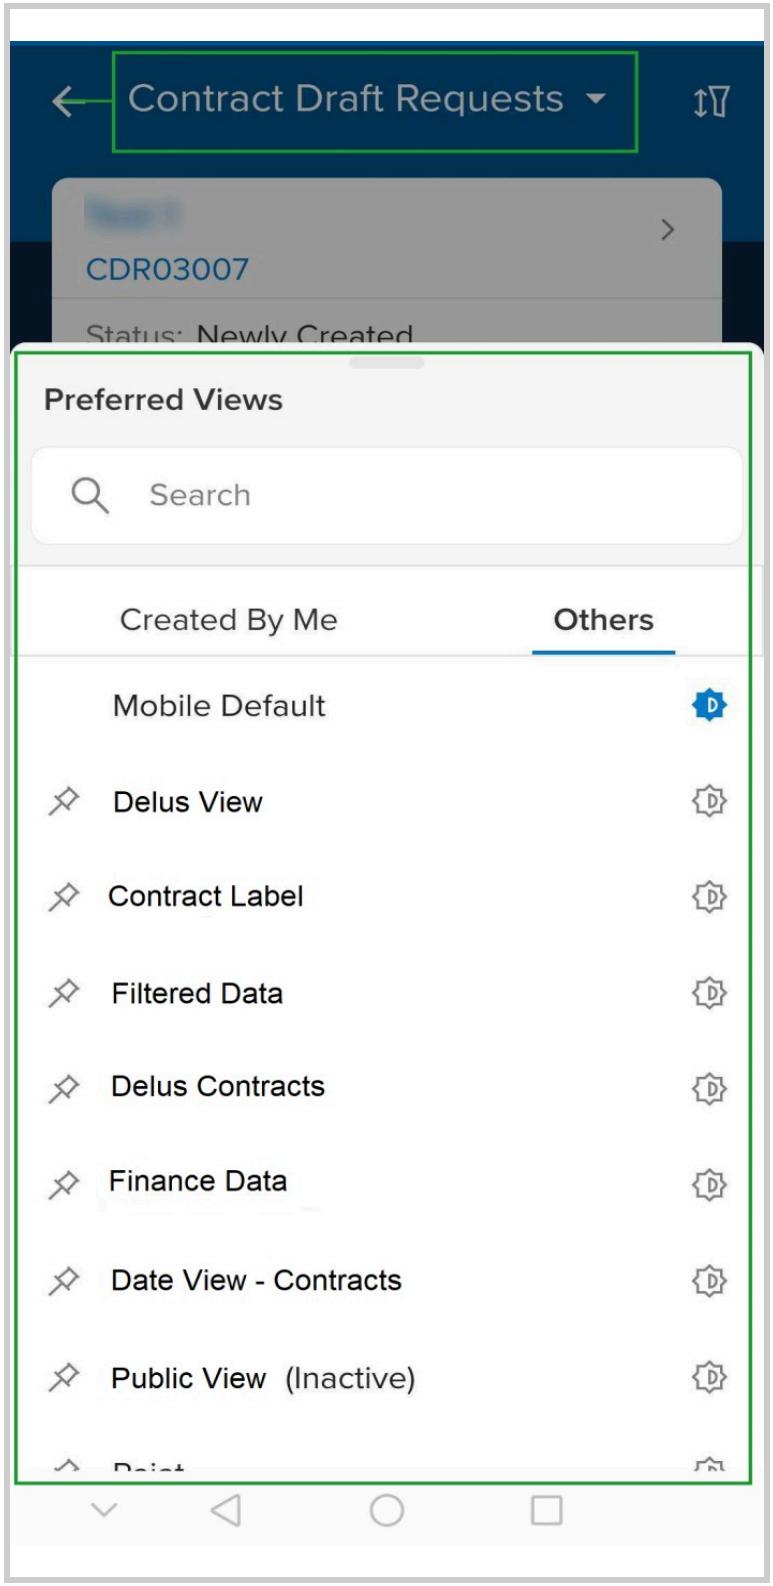

Focus Listen

Entity listing page displays a list of all records of the selected entity. The entity listing page displays the following options:

1. **Filters:** You may select the filters from the Filter panel to view the list of records accordingly. As compared to Sirion web application, filter fields are different in Sirion mobile application.
2. **Expand/Collapse:** The expand/collapse button helps you view more information about the entity record.
3. **Pagination:** The pagination buttons help you navigate from one page to another.
4. **Sorting:** To sort the entity and segregate the data. As compared to Sirion web application, sorting fields are different in Sirion mobile application.
5. **Preferred Listing View:** You can select the customized preferred views of the entity listing page. All the created views that are present on the web application are present here. You can select a view from the Public or Private view options. The following functionalities are available to perform on preferred views:
    - **Set Default View**: You can set the Default View of the listing page. Click the **Default** () icon present against a view to set it as a default view.
    - You can select a preferred view that has been created and is available using the web application. However, you cannot create a new preferred view using the mobile application.
