Entity Overview

Published on Apr 24, 2025

Focus Listen

The Sirion mobile application supports all the entities that are available on the desktop application. These entities are present in their respective groups and the permission to access these entities is dependent on the administration settings.

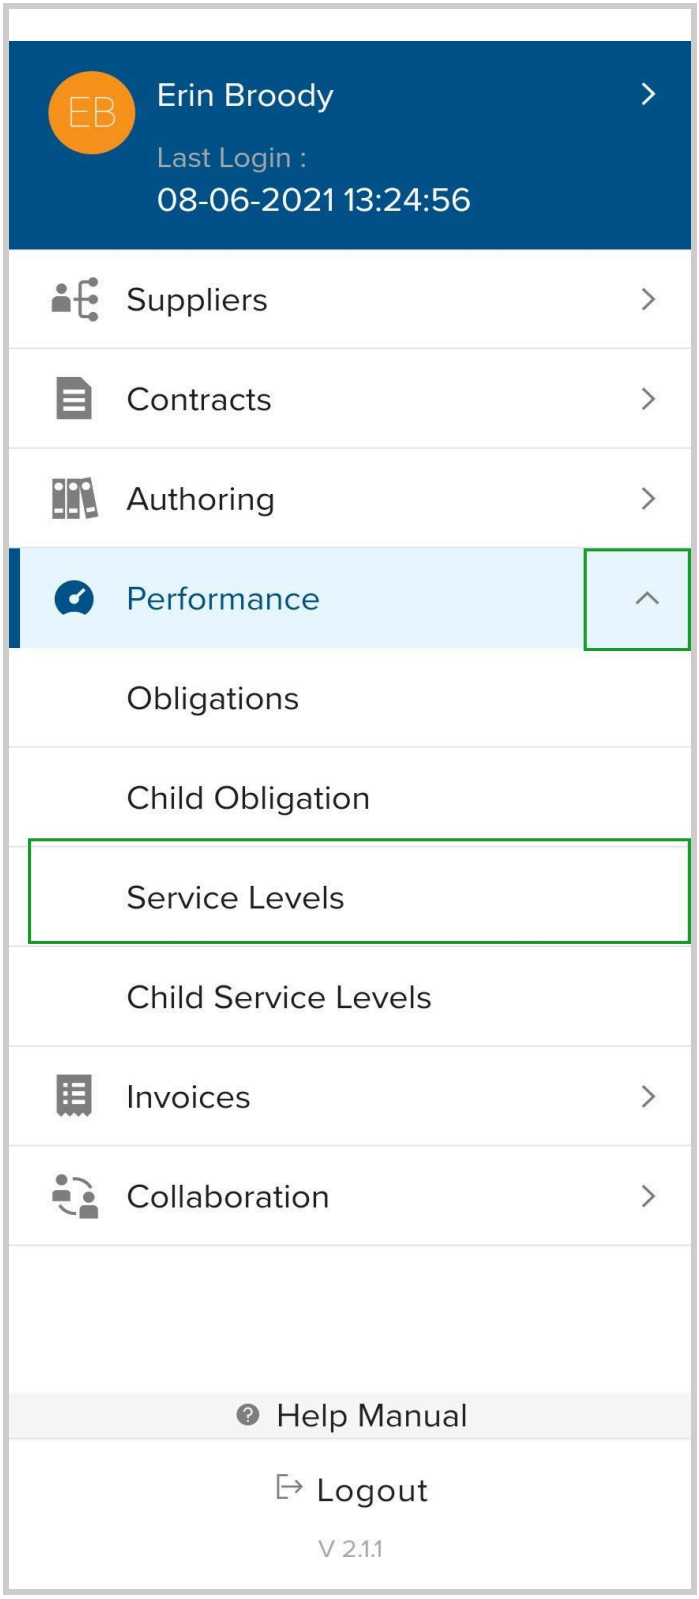

How to Access an Entity

An entity can be accessed in the following ways:

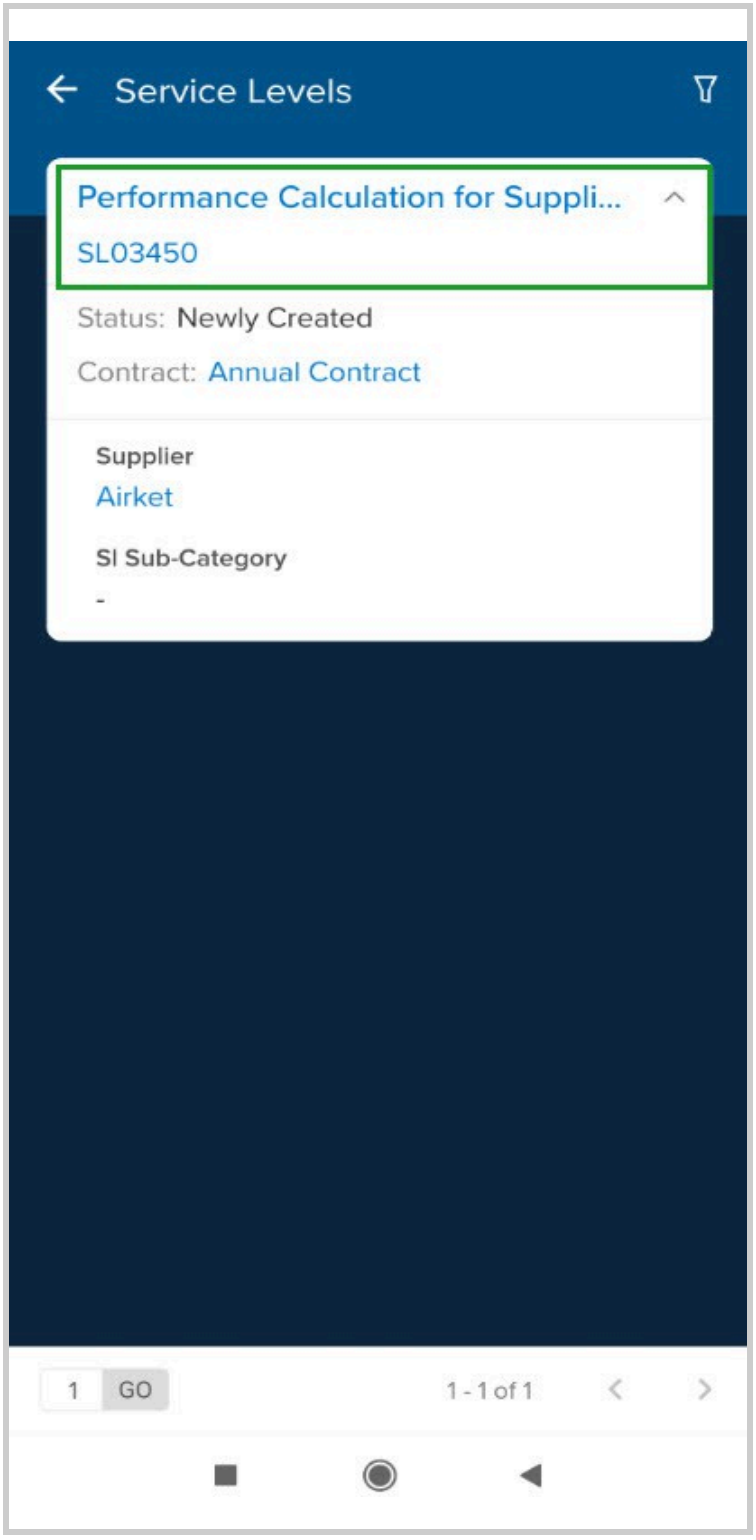

- You may access the entity list through the entity quick link under the relevant group of the Quick Link panel
- You may search for an entity by providing the entity ID in the Search bar

Perform the following steps to access the list of entities from the Quick Link Panel:

1. Click the Quick Link Panel icon () to expand the Quick Link Panel.
2. Expand a group to view relevant entities under it.
3. Click an entity from the group to view the list of entities.

4. Select filter criteria from the **Filters** option to narrow down the listing.

Workflow Actions on Entity

You can update the status of the entity based on your role group. The workflow action displayed on the entity will depend upon the type of user. You can also view and update the other workflow actions by using the More (•••) option.

Perform the following steps to update the workflow action for an entity:

1. Open an entity details page.
2. Click the **More** (•••) option and select the available workflow action.
3. Once the action is updated, the following message appears: "*Status Updated Successfully.*"
4. Click the **On Hold** to change the entity status to On Hold.
