Sign in through SSO

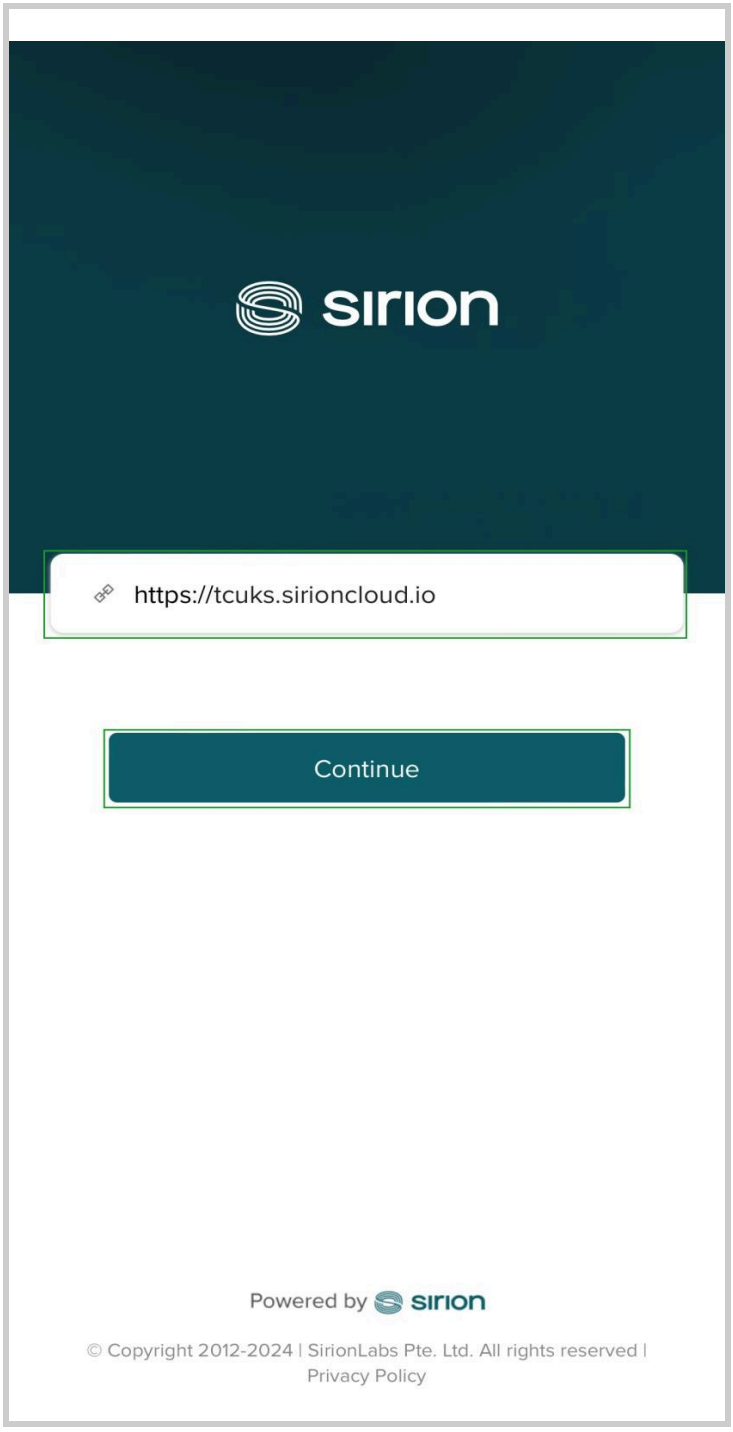

Updated on May 23, 2025

Focus Listen

Single Sign On SSO is an enterprise authentication process to access multiple applications with common login credentials.

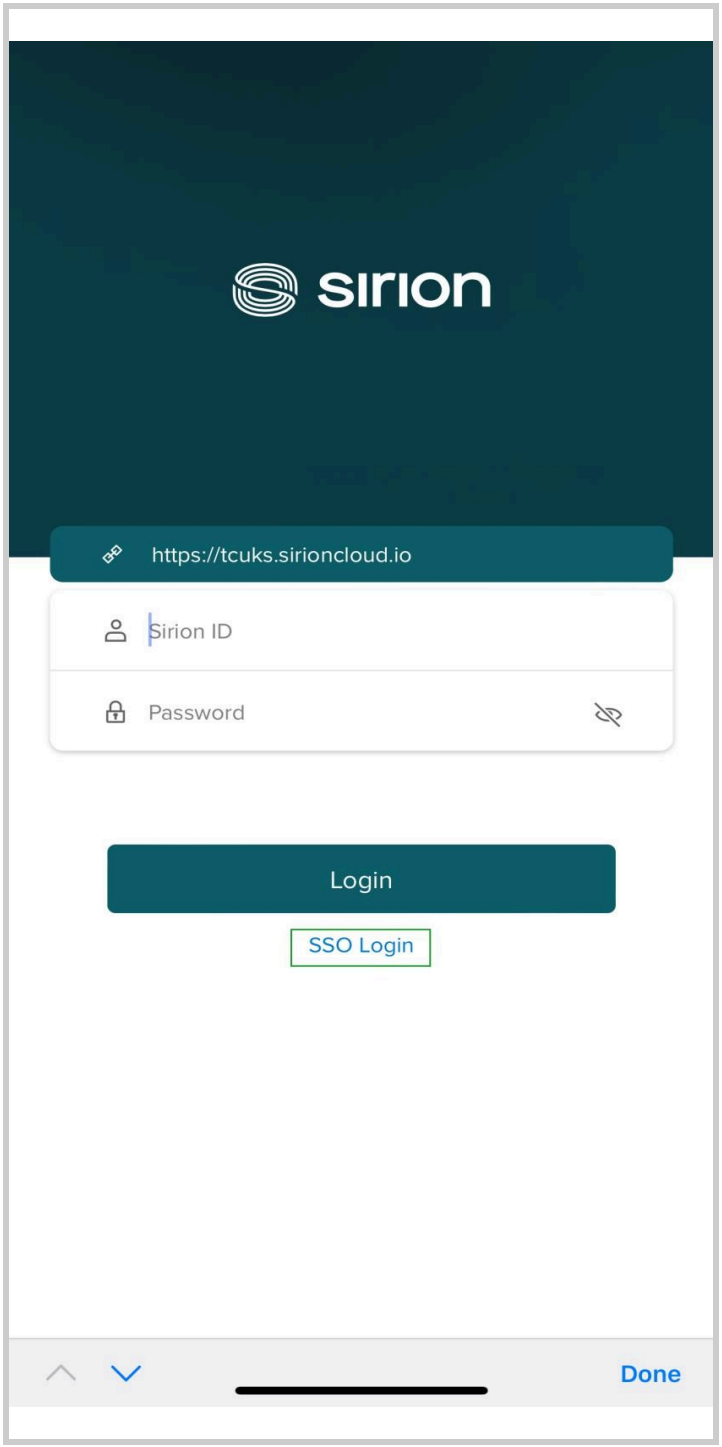

Perform the following steps to sign in through SSO:

1. Enter the Sirion URL and click **Continue**. The Sign into Sirion dialog box appears.

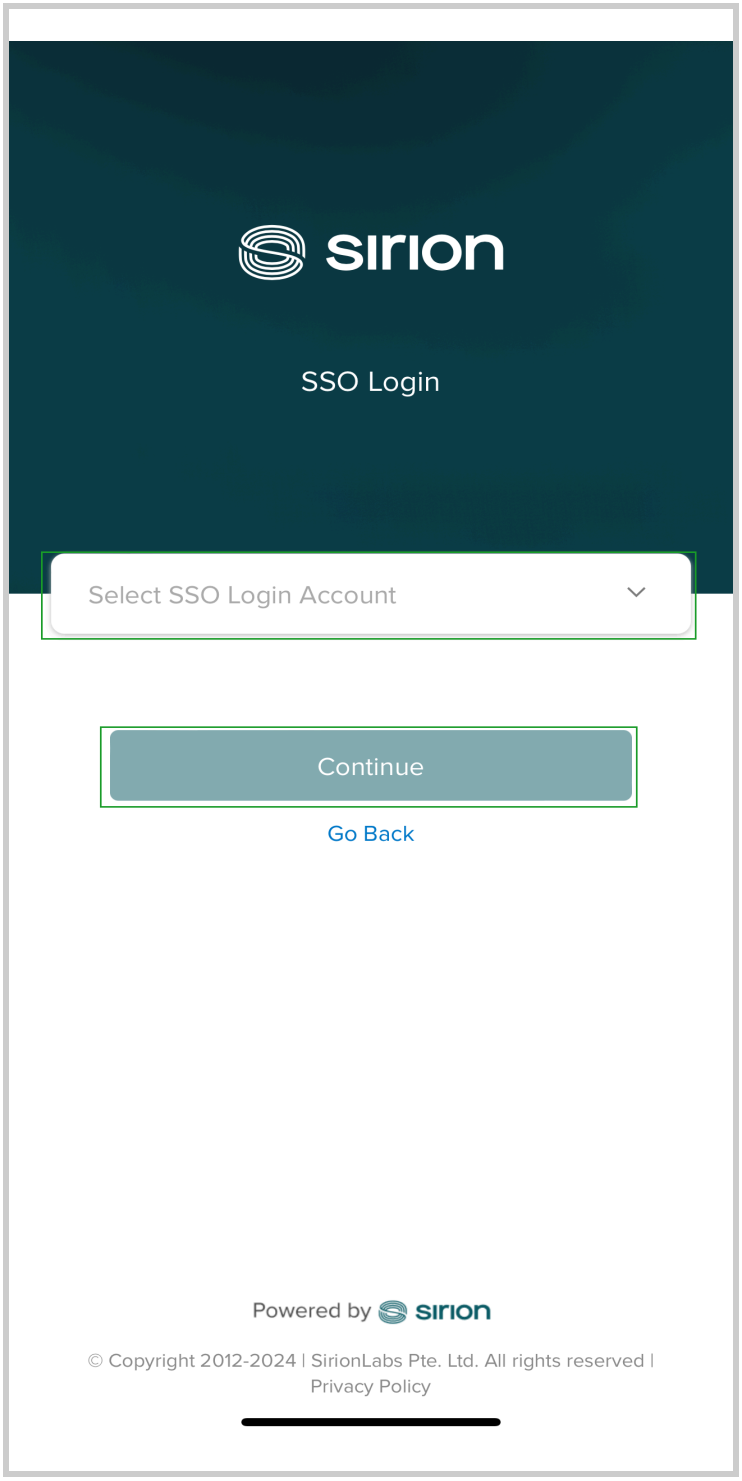

2. Click the **SSO Login**.

   A server login page appears.

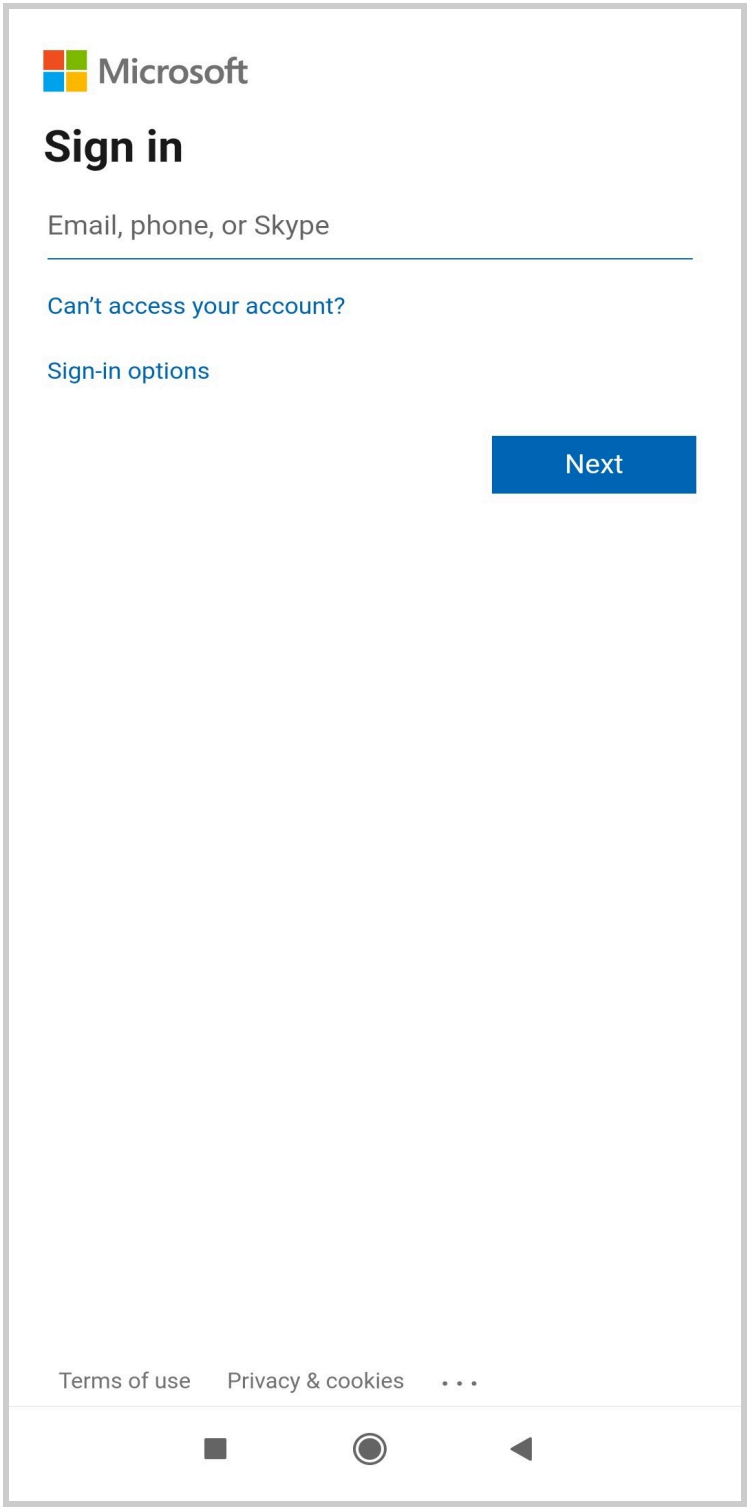

3. In case, multiple SSO IDP servers are created by your administrator, then select the relevant IDP server from drop down menu.

4. Enter **SSO** credentials on your server's login page.

   You are redirected to the Sirion Home Page.

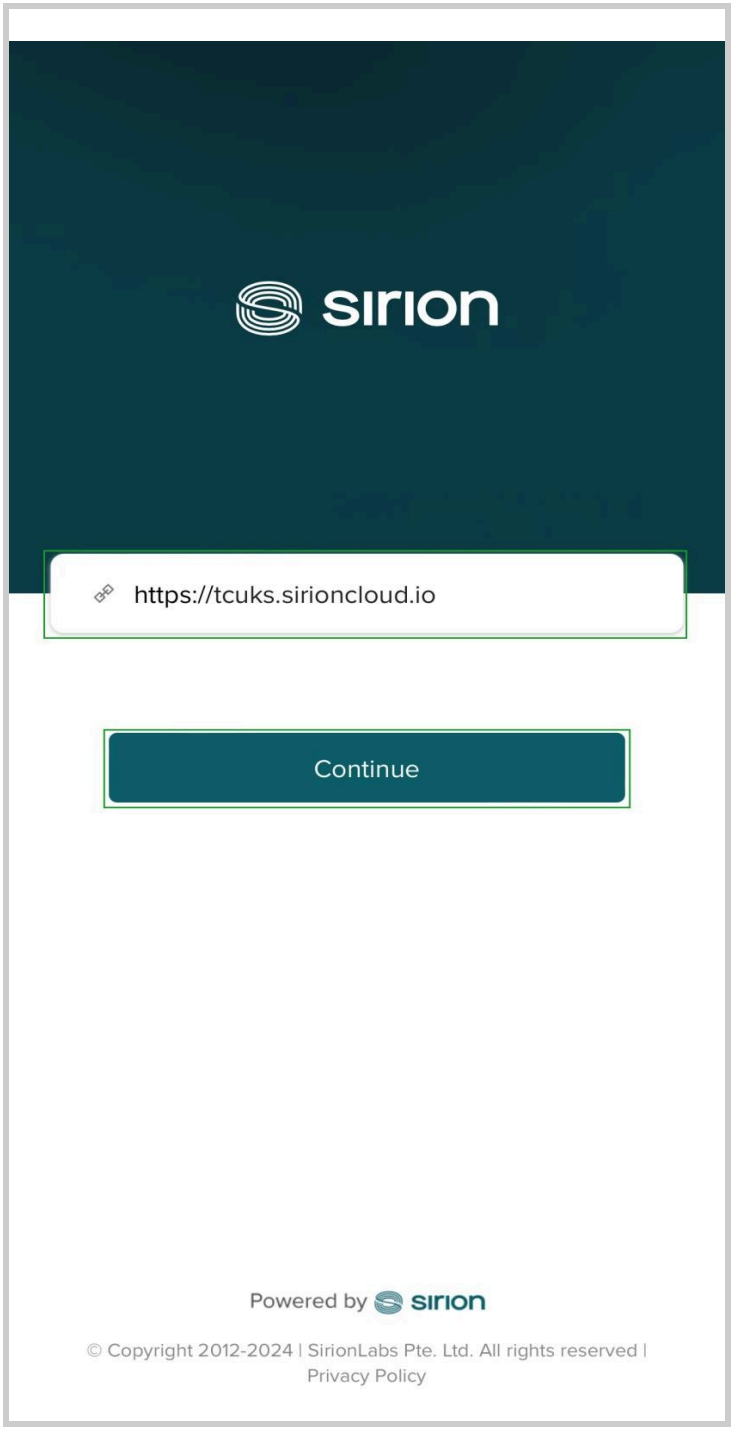

SSO Login via Two-Factor Authentication (2FA)

Perform the following steps to sign in through SSO via 2FA:

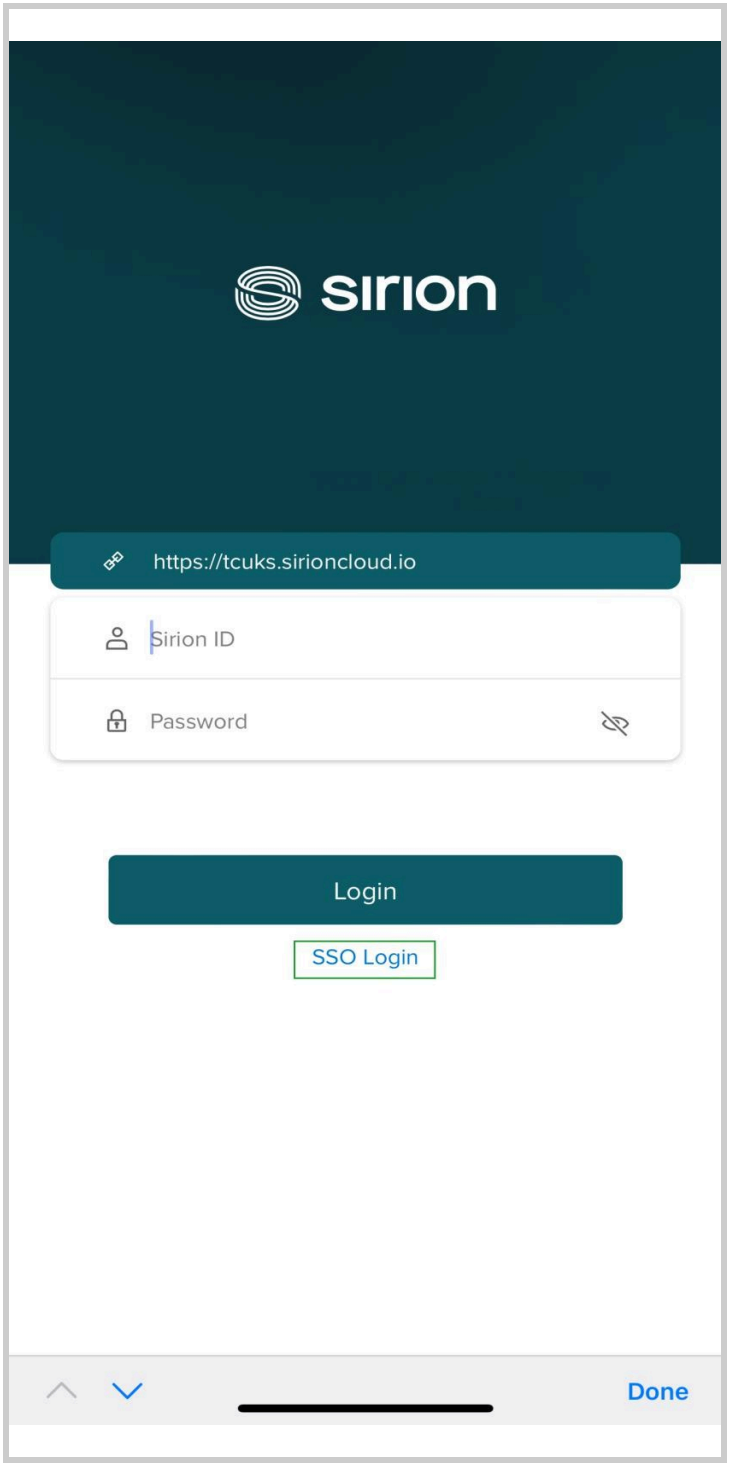

1. Enter the Sirion URL and click **Continue**.

   The Sign into Sirion dialog box appears.

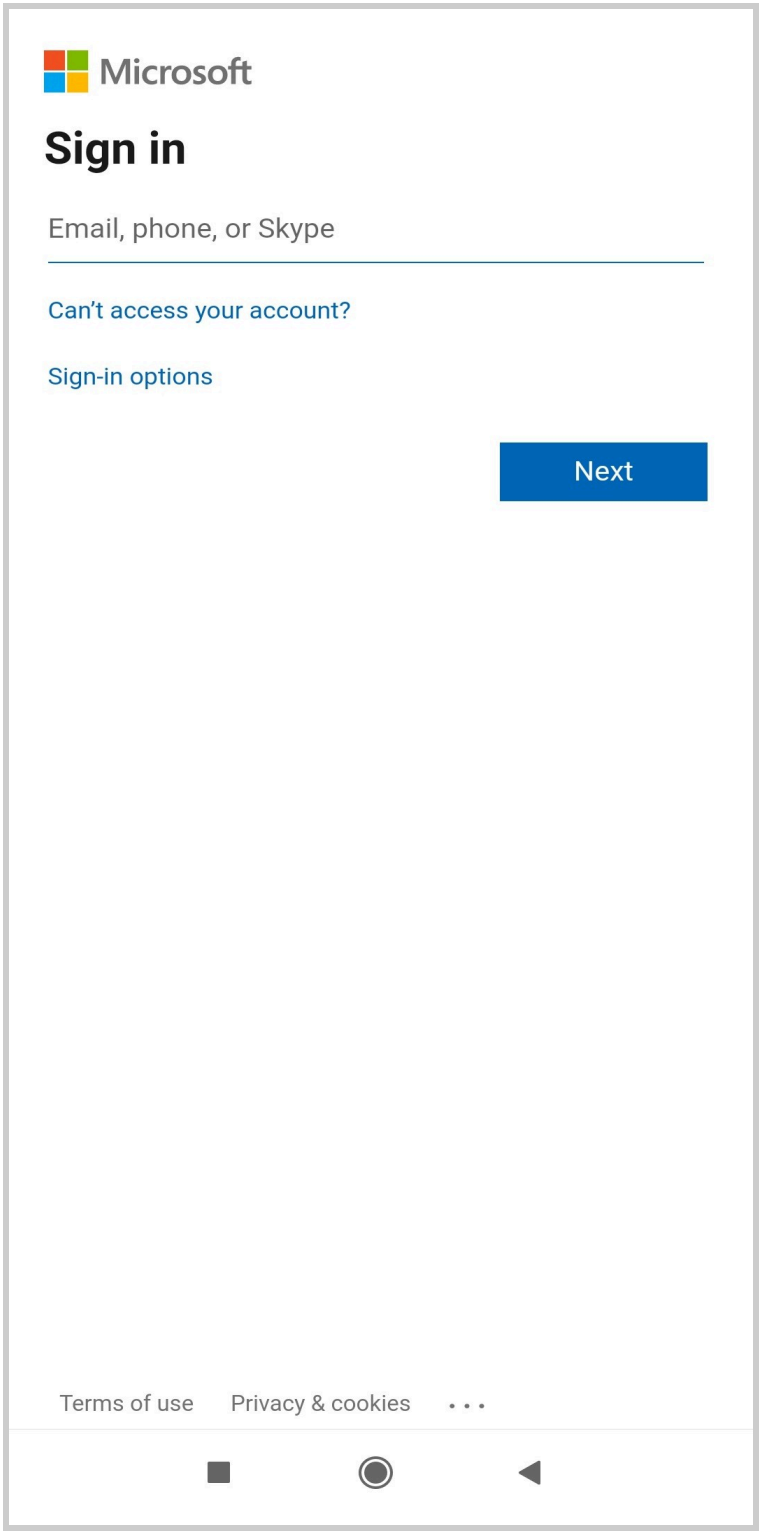

2. Click the **SSO Login**.

   A server login page appears.

3. Enter **SSO** credentials on your server's login page.

   The Sirion's 2FA login page appears.

4. Click the **Secure Login**.

   You are redirected to the Sirion Home Page.

5. Enter the OTP received via email/mobile authenticator in the respective field of Sirion's 2FA login page.
