FAQ

Why cannot I see my Sirion web app dashboards tabs on the Mobile app?

Mobile app has a small screen and use cases for the Mobile app are different, therefore, the Mobile app's dashboard is different from that of the web app.

Why can’t I find all the charts on the Sirion web app?

Sirion Mobile app supports only BI charts, excluding tables and pivots.

What if I select the wrong personas?

Persona selection is used to create a dashboard for the user when it logs in into the Mobile app for the very first time.

In case you have selected the wrong persona, you can simply go to the home page and add/remove the charts as per your desire.

Do we have a Create Entity capability in the Mobile app?

At present Create entity capability is not available in the Mobile app.

Can I edit the show page?

Mobile app does not support edits on the show page; however, if there are mandatory fields for the workflow to be updated, users will be allowed to update those fields.

Why cannot I find add-on tabs on the show page?

At present, add-on tabs, in the show page, are not supported in the Sirion Mobile app.

How can I change the language of the Sirion mobile app?

The language of the Sirion mobile app can be changed from the **My Profile** section of the Sirion web app.

Can I upload a template for Contract Request entity?

No, at present, Sirion mobile app does not support this capability.

How can I send the contract documents for E-Signature via mobile app?

No, at present, Sirion mobile app does not support this capability.

Can I change the position of charts in the dashboards?

Yes, you can change the position/sequence of the charts using the drag & drop method.

What are all the scenarios in which a Sirion mobile app user will receive a notification?

Users will receive a notification only when:

- He/she is tagged in a comment
- He/she is a stakeholder for the respective entity

Why I am seeing an error message when moving the workflow on the Contract Request entity show page?

If there is no document present in the ‘Contract Documents’ tab of Contract Request entity, then on moving the workflow forward, an error will appear on the Contract Request show page. There is an 'Open' link present in the error, clicking which you will be redirected to the ‘Contract Request’ show page of Sirion web application to know about

the error.

Are Sorting and Filter fields different in mobile and web application?

Yes, the Sorting and Filter fields are different in Sirion mobile application as compared to that of Sirion web application.

How can I create a new Contract Request through Sirion mobile application?

A new Contract Request can be created using the 'Raise a Request' option present on the Home page at the bottom of the screen.

How can I change the preferred view on the entity listing page?

Adjacent to the Entity name, a drop down consisting the list of preferred views is available. You can select the preferred view from the drop down.

What is the name of the default view in mobile application?

The **Mobile Default** is the default view, however on the web application System Default is present.

Is it possible to change the default view for the entity listing page?

Yes, you can change the default view for the entity listing page.
